

## SPECIFICATION

### Cyclopidene

| Parameters        | Specification                                                           |
|-------------------|-------------------------------------------------------------------------|
| Appearance        | Colorless to pale yellow liquid                                         |
| Molecular Formula | C <sub>8</sub> H <sub>12</sub> O <sub>2</sub>                           |
| Molecular Weight  | 140.18 g/mol                                                            |
| Boiling Point     | 180 °C                                                                  |
| Flash Point       | 45 °C                                                                   |
| Purity            | ≥ 95%                                                                   |
| Refractive Index  | 1.478                                                                   |
| Solubility        | Insoluble in water, soluble in organic solvents                         |
| Uses              | Intermediate in organic synthesis, Flavoring agent, Fragrance component |
